

c) Biological molecules

Students will be assessed on their ability to:

- 2.5 identify the chemical elements present in carbohydrates, proteins and lipids (fats and oils)
- 2.6 describe the structure of carbohydrates, proteins and lipids as large molecules made up from smaller basic units: starch and glycogen from simple sugar; protein from amino acids; lipid from fatty acids and glycerol
- 2.7 describe the tests for glucose and starch
- 2.8 understand the role of enzymes as biological catalysts in metabolic reactions
- 2.9 understand how the functioning of enzymes can be affected by changes in temperature, including changes due to change in active site
- 2.10 understand how the functioning of enzymes can be affected by changes in active site caused by changes in pH**
- 2.11 describe experiments to investigate how enzyme activity can be affected by changes in temperature.

d) Movement of substances into and out of cells

Students will be assessed on their ability to:

- 2.12 understand definitions of diffusion, osmosis and active transport
- 2.13 understand that movement of substances into and out of cells can be by diffusion, osmosis and active transport
