

(b) Group 7 (halogens) – chlorine, bromine and iodine	
Students should:	
2.5	know the colours, physical states (at room temperature) and trends in physical properties of these elements
2.6	use knowledge of trends in Group 7 to predict the properties of other halogens
2.7	understand how displacement reactions involving halogens and halides provide evidence for the trend in reactivity in Group 7
2.8C	explain the trend in reactivity in Group 7 in terms of electronic configurations
