

## 4      **Graphs**

| What students need to learn                                                          | Notes                                                                  |
|--------------------------------------------------------------------------------------|------------------------------------------------------------------------|
| <b>A</b> Graphs of polynomials and rational functions with linear denominators       | The concept of asymptotes parallel to the coordinate axes is expected. |
| <b>B</b> The solution of equations and transcendental functions by graphical methods | Non-graphical iterative methods are not required.                      |
