

Section 6: Magnetism and electromagnetism

- a) Units
- b) Magnetism
- c) Electromagnetism
- e) Electromagnetic induction

a) Units

Students will be assessed on their ability to:

- 6.1 use the following units: ampere (A), volt (V), watt (W).

b) Magnetism

Students will be assessed on their ability to:

- 6.2 understand that magnets repel and attract other magnets and attract magnetic substances**
- 6.3 describe the properties of magnetically hard and soft materials**
- 6.4 understand the term 'magnetic field line'
- 6.5 understand that magnetism is induced in some materials when they are placed in a magnetic field**
- 6.6 describe experiments to investigate the magnetic field pattern for a permanent bar magnet and that between two bar magnets
- 6.7 describe how to use two permanent magnets to produce a uniform magnetic field pattern.

c) Electromagnetism

Students will be assessed on their ability to:

- 6.8 understand that an electric current in a conductor produces a magnetic field round it
- 6.9 describe the construction of electromagnets**
- 6.10 sketch and recognise magnetic field patterns for a straight wire, a flat circular coil and a solenoid when each is carrying a current**
