

1. Further kinematics

What students need to learn:

Kinematics of a particle moving in a straight line when the acceleration is a function of the displacement (x), or time (t).

The setting up and solution of equations where

$$\frac{dv}{dt} = f(t), v \frac{dv}{dx} = f(x), \frac{dx}{dt} = f(x) \text{ or } \frac{dx}{dt} = f(t)$$

will be consistent with the level of calculus required in units C12 and C34.
