

4. Motion in a circle

What students need to learn:

Angular speed.

Radial acceleration in circular motion.

The forms $r\omega^2$ and $\frac{v^2}{r}$ are required.

Uniform motion of a particle moving in a horizontal circle.

Problems involving the 'conical pendulum', an elastic string, motion on a banked surface, as well as other contexts, may be set.

Motion of a particle in a vertical circle.
