

3. Probability		
3.1	Elementary probability.	
3.2	Sample space. Exclusive and complementary events. Conditional probability.	Understanding and use of $P(A') = 1 - P(A),$ $P(A \cup B) = P(A) + P(B) - P(A \cap B),$ $P(A \cap B) = P(A) P(B A).$
3.3	Independence of two events.	$P(B A) = P(B), P(A B) = P(A),$ $P(A \cap B) = P(A) P(B).$
3.4	Sum and product laws.	Use of tree diagrams and Venn diagrams. Sampling with and without replacement.
