

3.5 Processing Results

Students will be provided with a set of experimental results that were obtained by a more-experienced student conducting an experiment.

Candidates will be assessed on their ability to:

Process results

- perform calculations, using the correct number of significant figures
 - plot results on a graph using an appropriate scale
 - use the correct units throughout
 - comment on the relationship obtained from the graph
 - determine the relationship between two variables or determine a constant with the aid of a graph, e.g. by determining the gradient using a large triangle
 - suggest realistic modifications to reduce errors
 - suggest realistic modifications to improve the experiment
 - discuss uncertainties, qualitatively and quantitatively
 - determine the percentage uncertainty in measurements for a single reading using **half** the resolution of the instrument **and** from multiple readings using the **half** range (students are **not** expected to compound percentage uncertainties).
-
