

**Topic 6: Humans and animals – The circulatory system**

| <b>Students should:</b> |                                                                                           | <b>Guidance</b><br><i>iLowerSecondary Curriculum reference</i>                                                                      |
|-------------------------|-------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------|
| 6.1                     | know the difference between single and double circulatory systems                         | <i>Year 9: Humans and animals – The circulatory system</i>                                                                          |
| 6.2                     | know the main components of the circulatory system and their functions                    | to include heart, arteries, veins, capillaries<br><i>Year 9: Humans and animals – The circulatory system</i>                        |
| 6.3                     | explain the differences in pressure and rate of flow in arteries, veins and capillaries   | recognise cross-sectional diagrams of arteries, veins and capillaries<br><i>Year 9: Humans and animals – The circulatory system</i> |
| 6.4                     | know the effect of exercise on the heart rate and explain why these changes are important | <i>Year 9: Humans and animals – The circulatory system</i>                                                                          |
| 6.5                     | understand how to measure average pulse rate by counting beats per minute                 | <i>Year 9: Humans and animals – The circulatory system</i>                                                                          |
| 6.6                     | know how to interpret line graphs, showing how pulse rate changes with exercise           | <i>Year 9: Humans and animals – The circulatory system</i>                                                                          |
| 6.7                     | explain how lifestyle factors may contribute to cardiovascular disease                    | <i>Year 9: Humans and animals – The circulatory system</i>                                                                          |
