

Topic 8: Organisms and their environment – Interactions with the environment

Students should:		Guidance <i>iLowerSecondary Curriculum reference</i>
8.1	know how living organisms are adapted to their habitat relating these principles to a range of organisms in the local and wider environment	given a picture or fact sheet, students should be able to identify how a plant or animal is adapted to an environment, for example polar bear/tiger <i>Year 7: Organisms and their environment – Interactions with the environment</i>
8.2	know the difference between abiotic and biotic factors, using examples of each	for example, an abiotic factor may be the temperature or the light intensity; a biotic factor may be competition with other animals, predation or disease <i>Year 7: Organisms and their environment – Interactions with the environment</i>
8.3	understand the effect of changing environmental conditions on the number and distribution of organisms in a variety of habitats	<i>Year 7: Organisms and their environment – Interactions with the environment</i>
