

2 Subject content and assessment information

Qualification aims and objectives

The International Award in Lower Secondary Computing aims to ensure that all students:

- can understand and apply the fundamental principles and concepts of computer science, including abstraction, logic, algorithms and data representation
- can analyse problems in computational terms and that they have repeated practical experience of writing computer programs in order to solve such problems
- can evaluate and apply information technology, including new or unfamiliar technologies, analytically to solve problems
- are responsible, competent, confident and creative users of information and communication technology.

Content

Overview

The Pearson Edexcel International Award in Lower Secondary Computing requires students to demonstrate knowledge, understanding and application of the following learning objectives drawn from the Pearson Edexcel iLower Secondary Curriculum in Computing.
