

Section A – Computer Science

Topic 1 – Problem solving: algorithms, decomposition and abstraction

Students should:		Curriculum reference
1.1	Be able to produce algorithms using flowcharts and structured English	PS7.1A PS8.1A PS9.1A PS9.2B
1.2	Understand how bubble sort and linear search algorithms work	PS9.1B PS9.2C, D
1.3	Be able to look for the most efficient solution when comparing alternative algorithms for the same problem	PS7.1B PS9.2E
1.4	Be able to design and use computational abstractions that model the state and behaviour of real-world problems and physical systems	PS7.2A PS8.2B PS9.2A, E
