

6.10	know different mechanisms by which seeds are dispersed	including: • water, for example coconut • wind, for example poppy, dandelion and sycamore seeds • animals, for example fruits, nuts and berries • explosion, for example peas and vetch. <i>Year 6: Plant life cycles</i>
------	--	--

Topic 7: Heart, lungs and circulation

Students should:		Guidance <i>iPrimary Curriculum reference</i>
7.1	know that the heart is an organ that pumps blood as part of the circulatory system	<i>Year 6: Heart, lungs and circulation</i>
7.2	understand that water and nutrients are transported around our bodies in blood	<i>Year 6: Heart, lungs and circulation</i>
7.3	know that the circulatory system comprises the heart and blood vessels that contain blood	<i>Year 6: Heart, lungs and circulation</i>
7.4	understand how pulse rate changes with exercise	pulse rate can be measured in beats per minute (bpm) <i>Year 6: Heart, lungs and circulation</i>
7.5	explain the reason for a change of pulse rate during exercise in terms of transporting oxygen and nutrients to muscles	<i>Year 6: Heart, lungs and circulation</i>
7.6	know that the lungs are located in the thorax and that they are the organs used for breathing	<i>Year 6: Heart, lungs and circulation</i>
7.7	understand that air is a mixture of gases, including oxygen	<i>Year 6: Heart, lungs and circulation</i>
7.8	understand that blood picks up oxygen from the lungs and transports it through blood vessels to organs of the body	<i>Year 6: Heart, lungs and circulation</i>
7.9	know how to distinguish and use the terms <i>breathing</i> (ventilation of the lungs) and <i>respiration</i> (how oxygen is used by the body once it reaches organs)	only a simple distinction is required at this level <i>Year 6: Heart, lungs and circulation</i>
