

Topic 8: Solids, liquids and gases

Students should:		Guidance <i>iPrimary Curriculum reference</i>
8.1	know how to identify substances as solids, liquids and gases and distinguish between them	<i>Year 4: Solids, liquids and gases</i>
8.2	know some common properties of solids, liquids and gases	for example: • solids hold their shape and do not flow • liquids flow and form a pool/take the shape of the bottom of a container • gases move easily and escape from unsealed containers. <i>Year 4: Solids, liquids and gases</i>
8.3	understand that solids consisting of very small particles can behave as liquids in some ways	for example sand will 'flow' <i>Year 4: Solids, liquids and gases</i>
8.4	understand that temperature is a measure of how hot or cold something is and is measured in degrees Celsius (°C) using a thermometer	<i>Year 4: Solids, liquids and gases</i>
8.5	understand that water exists in three states and changes from one to another at different temperatures	<i>Year 4: Solids, liquids and gases</i>
8.6	understand that different substances change state at different temperatures	<i>Year 4: Solids, liquids and gases</i>
