

Topic 12: Electricity: everyday uses and simple circuits

Students should:		Guidance
		<i>iPrimary Curriculum Reference</i>
12.1	understand some uses of electricity and identify common appliances which use electricity	identify some common appliances which use electricity to produce light, heat, movement, sound or combinations of these <i>Year 4: Electricity: everyday uses and simple circuits</i>
12.2	know about dangers associated with mains electricity	for example electrocution and fire <i>Year 4: Electricity: everyday uses and simple circuits</i>
12.3	understand that some devices use batteries which supply electricity	use the term 'cell' for individual units of a 'battery' <i>Year 4: Electricity: everyday uses and simple circuits</i>
12.4	understand that a circuit needs a power source to work	<i>Year 4: Electricity: everyday uses and simple circuits</i>

Students should:		Guidance
		<i>iPrimary Curriculum Reference</i>
12.5	understand that a complete circuit is needed for a device to work and that a switch can be used to break a circuit	identify simple connection errors in circuits drawn in 3D or using symbols predict the effects of open and closed switches in a series circuit understand the effects of a component failure in a series circuit <i>Year 4: Electricity: everyday uses and simple circuits</i>
12.6	understand that some materials conduct electricity better than others using the terms <i>electrical conductor</i> and <i>insulator</i>	<i>Year 4: Electricity: everyday uses and simple circuits</i>
12.7	understand the use of common electrical conductors and insulators, for example contrast the use of plastic and copper in electrical cables and household appliances	<i>Year 4: Electricity: everyday uses and simple circuits</i>
