

Overview

- Art, Craft and Design – Combined Specialisms is a broad course exploring practical and critical/contextual work through a range of 2D and/or 3D processes and media.
- Learners should be able to explore, research and acquire techniques and develop their skills, knowledge and understanding in a range of media.
- Learners in Art, Craft and Design – Combined Specialisms are expected to produce a range of 2D and/or 3D work to evidence study of at least two specialisms in each component. Final outcomes for each component may be in one or a number of specialisms.
- Learners may use traditional methods and/or digital techniques to produce work.
- Learners should explore relevant images, artefacts and resources.
- Drawing skills should be understood and developed as appropriate to the ways of recording and communicating intentions, ideas and emotions in the context of the chosen specialisms.
