

Areas of Study

Learners are required to work in **one or more** area(s) of Three-Dimensional Design, such as those listed below. Combinations of these areas are also possible:

- craft or commercial ceramics
- commercial sculpture or sculptural commissions
- commercial Three-Dimensional Design, working for a client to create a three-dimensional item, such as an item of jewellery
- design and/or construction for television, games or film
- stage, environmental or architectural design and/or construction
- experimental Three-Dimensional Design (construction/montage/assemblage)
- body ornament (jewellery, fashion accessories, body painting and film or TV prosthetics)
- product design and realisation
- constructions in a range of materials.

Techniques

The following are some of the techniques available to learners in Three-Dimensional Design: drawing, modelling, casting, construction, carving, metal working, computer-aided design, welding, assemblage, laser cutting, 3D printing, ceramics and mixed-media applications.
