

the specification content to be covered in a way that integrates the various aspects of chemistry and relates the subject to modern applications and everyday experience. Learners will be expected to be able to apply their understanding of chemistry to unfamiliar contexts in the assessments.

References to HSW (Section 5d) are included in the guidance to highlight opportunities to encourage a wider understanding of science.

The mathematical requirements in Section 5e are also referenced by the prefix M (in the additional guidance) to link the mathematical skills required for AS Level Chemistry to examples of science content where those mathematical skills could be linked to learning.

Section 2c in the specification content relates to the practical skills learners are expected to gain throughout the course, which are assessed throughout the written examinations.

Practical activities are embedded within the learning outcomes in Section 2d (Storylines). Suggestions for practical work are also highlighted in the additional guidance (*italics*) to encourage practical activities in the laboratory, enhancing learners' understanding of chemical theory and practical skills.

Section 2d – Storylines

- Elements of life
- Developing fuels
- Elements from the sea
- The ozone story
- What's in a medicine?
