

**8.2 How can design engineers assess whether a design solution meets the criteria of technical specifications?**

- a. Demonstrate an understanding of the methods and importance of undertaken physical testing on a product to ensure it meets the criteria it is meant to fulfil, including:
- i. functionality
  - ii. accuracy
  - iii. performance.

- b. Recognise how physical testing systems are integrated into the manufacturing process to test functionality, including:
- i. destructive and non-destructive methods
  - ii. testing of materials for durability
  - iii. testing models and prototypes for performance and fitness for purpose
  - iv. testing products in use through different methods, such as:
    - consumer testing
    - virtual testing.
