

8.3 How do design engineers and manufacturers determine whether design solutions are commercially viable?

- a. Demonstrate an understanding of the value of feasibility studies to determine the likely factors that influence the commercial viability of a product to market, such as:
- the design solution's impact on user lifestyles
 - how well a product performs
 - technical difficulty of manufacture
 - stock availability of materials and components
 - costs and profit
 - timescales involved
 - promotion, brand awareness and advertising potential
 - balancing supply and demand
 - market analysis of similar products.
