

6.2 How can products be designed to function effectively within their surroundings?

- | | |
|---|---|
| <p>a. Demonstrate an understanding of surface finishes, decorative techniques and surface pattern technology that can be used to enhance the aesthetic qualities of products, including:</p> <ul style="list-style-type: none">i. printing and dyeing techniques, such as screen, block, roller and discharge printing, and methods of resist and vat dyeing.ii. biological techniques, such as the use of natural enzymes to create stone wash effects on jeansiii. embroidery and appliqué techniquesiv. mechanical process, such as embossing and heat setting used on thermo polymer fabrics to shape or create pleats.v. digital technologies used to print, emboss and cut designs, such as dye sublimation printing and use of a laser cutter. |  |
| <p>b. Understand how materials and products can be finished in different ways to prevent corrosion or decay, or enhance their performance for their intended purpose, including:</p> <ul style="list-style-type: none">i. methods of laminating to strengthen fabricsii. chemicals finishes used to improve a fabric's performance such as: water repellence, stain resistance, flame resistance, anti-static, moth-proofing, anti-pilling, rot proofing, anti-felting, hygienic (sanitised)iii. breathable coatings for high performance weariv. transparent coatings on fine fabrics. |  |
