

7.3 How can materials and processes be used to make commercial products?

- | | |
|--|---|
| <p>a. Recognise the tools, processes and machinery required to complete a range of textiles products in industry, including:</p> <ul style="list-style-type: none"> i. dyeing processes ii. hand and digital printing processes such as, screen, roller and transfer printing methods iii. transferring pattern markings using thread markers, drills and hot notchers iv. cutting fabrics using multi-ply fabric cutting, computer-controlled knives, lasers, water jets, plasma or ultra sound to cut fabric and prevent fraying v. joining fabrics using lockstitch, overlocker, seamcover, linking, automatic buttonhole and computer-controlled sewing machines vi. finishing fabrics and garments using pressing units, ironing and sleeve boards, steam dollies, tunnel finishers and flatbed presses for trousers. |  |
| <p>b. Understand the necessity for fashion and textiles manufacturers to optimise the use of materials and production processes, such as:</p> <ul style="list-style-type: none"> • economical lay plans and costing; ensuring cost effective production for viability • working to a budget through efficient manufacture and making the best use of labour and capital throughout the design and manufacturing process. |  |
