

4.09 Polar Coordinates				
4.09a	Polar coordinates		a) Understand and be able to use polar coordinates (using the convention $r \geq 0$) and be able to convert between polar and cartesian coordinates.	G1
4.09b	Sketching curves		b) Be able to sketch polar curves, with r given as a function of θ . <i>Identify significant features of polar curves such as symmetry, and least and greatest values of r.</i> <i>Includes use of trigonometric functions.</i>	G2
4.09c	Area		c) Be able to find the area enclosed by a polar curve. <i>Be able to use the formula $\frac{1}{2} \int r^2 d\theta$.</i>	G3
