

5.3 COMPETENCE STATEMENTS

The unit specifications include competence statements. These are designed to help users by clarifying the requirements, but the following three points need to be noted:

- work that is covered by a competence statement may be asked in an examination question without further assistance being given;
- examination questions may require candidates to use two or more competence statements at the same time without further assistance being given;
- where an examination question requires work that is not covered by a competence statement, sufficient guidance will be given within the question.

Competence statements have an implied prefix of the words: ‘A student should ...’

The letters used in assigning reference numbers to competence statements are as follows.

a	algebra	A	Algorithms
b	bivariate data	B	
c	calculus	C	Curves, Curve sketching
d	dynamics	D	Data presentation
e	equations	E	
f	functions	F	
g	geometry, graphs	G	Centre of mass
h	Hooke’s law	H	Hypothesis testing
i	impulse and momentum	I	Inference
j	complex numbers	J	
k	kinematics	K	
l		L	Linear programming
m	matrices	M	Matchings
n	Newton’s laws	N	Networks
o	oscillations (SHM)	O	
p	mathematical processes (modelling, proof, etc)	P	Polar coordinates
q	dimensions (quantities)	Q	
r	rotation	R	Random variables
s	sequences and series	S	
t	trigonometry	T	Number Theory
u	probability (uncertainty)	U	Errors (uncertainty)
v	vectors	V	
w	work, energy and power	W	
x	experimental design	X	Critical path analysis
y	projectiles	Y	
z		Z	Simulation
