

3.01 Quantities and Units in Mechanics

3.01a	SI units	a) Understand and be able to use the fundamental quantities and units in the S.I. system: length (in metres), time (in seconds), mass (in kilograms). <i>Learners should understand that these three base quantities are mutually independent.</i>	c) Understand and be able to use the unit for moment (N m).	MP1
3.01b 3.01c		b) Understand and be able to use derived quantities and units: velocity (m/s or m s^{-1}), acceleration (m/s^2 or m s^{-2}), force (N), weight (N). <i>Learners should be able to add the appropriate unit to a given quantity.</i>
