

5.4.4 Gravitational potential and energy

Learning outcomes	Additional guidance
<i>Learners should be able to demonstrate and apply their knowledge and understanding of:</i>	
(a) gravitational potential at a point as the work done in bringing unit mass from infinity to the point; gravitational potential is zero at infinity	
(b) gravitational potential $V_g = -\frac{GM}{r}$ at a distance r from a point mass M ; changes in gravitational potential	
(c) force–distance graph for a point or spherical mass; work done is area under graph	HSW5
... $\frac{GMm}{r}$
