

Learning outcomes	Additional guidance
<i>Learners should be able to demonstrate and apply their knowledge and understanding of:</i>	
(a) tensile and compressive deformation; extension and compression	
(b) Hooke's law	
(c) force constant k of a spring or wire; $F = kx$	
(d) (i) force–extension (or compression) graphs for springs and wires.	M3.2
(ii) techniques and procedures used to investigate force–extension characteristics for arrangements which may include springs, rubber bands, polythene strips.	PAG2
