

5.1.1 Temperature

Learning outcomes	Additional guidance
<i>Learners should be able to demonstrate and apply their knowledge and understanding of:</i>	
(a) thermal equilibrium	
(b) absolute scale of temperature (i.e. the thermodynamic scale) that does not depend on property of any particular substance	
(c) temperature measurements both in degrees Celsius ($^{\circ}\text{C}$) and in kelvin (K)	
(d) $T(\text{K}) \approx \theta(^{\circ}\text{C}) + 273$.
