

5.1.3 Thermal properties of materials

Learning outcomes	Additional guidance
<i>Learners should be able to demonstrate and apply their knowledge and understanding of:</i>	
(a) specific heat capacity of a substance; the equation $E = mc\Delta\theta$	HSW4 Estimating specific heat capacity of water using method of mixture.
(b) (i) an electrical experiment to determine the specific heat capacity of a metal or a liquid (ii) techniques and procedures used for an electrical method to determine the specific heat capacity of a metal block and a liquid	
(c) specific latent heat of fusion and specific latent heat of vaporisation; $E = mL$	
(d) (i) an electrical experiment to determine the specific latent heat of fusion and vaporisation (ii) techniques and procedures used for an electrical method to determine the specific latent heat of a solid and a liquid.
