

5.4.4 Gravitational potential and energy

Learning outcomes	Additional guidance
<i>Learners should be able to demonstrate and apply their knowledge and understanding of:</i> (a) gravitational potential at a point as the work done in bringing unit mass from infinity to the point; gravitational potential is zero at infinity (b) gravitational potential $V_g = -\frac{GM}{r}$ at a distance r from a point mass M; changes in gravitational potential (c) force–distance graph for a point or spherical mass; work done is area under graph (d) gravitational potential energy $E = mV_g = -\frac{GMm}{r}$ at a distance r from a point mass M (e) escape velocity.	HSW1, HSW2 Predicting the escape velocity of atoms in the atmosphere of planets.
