

Module 3: Physics in action

This module is intended to provide a graduated path from GCSE work into A level work, develop the skills and habits of independent working and show a wide range of ways in which physics is put to use. It includes many opportunities for practical work that will develop experimental and analytical skills. The

module covers a number of techniques and concepts from different areas of physics. This gives learners an early opportunity to appreciate the breadth of the subject and its practical, conceptual and mathematical demands.
