

2c. Content of Researching and understanding social inequalities: (02)

This component explores the methods of sociological enquiry and develops knowledge and understanding of contemporary social processes and social change in the context of social inequality and difference. This component aims to foster the development of critical and reflective thinking with a respect for social diversity in terms of social class, gender, ethnicity and age. It develops links between the nature of sociological thought and methods of sociological enquiry.

Although not directly assessed, this component encourages learners to carry out their own small-scale research projects as a way of enhancing their sociological understanding of methodology, substantive topic areas and core themes.

The following tables outline the content that must be studied. This is split into two sections, Section A and Section B.
