

Skills	Learners are required to demonstrate the knowledge, skills and understanding as defined in the Art and Design Core Content section of this specification in the context of their chosen area(s) of Three-Dimensional Design. In addition, learners will be required to demonstrate skills in the following: • develop ideas through investigations informed by selecting and critically analysing sources • apply an understanding of relevant Three-Dimensional Design practices in the creative and cultural industries to their work • refine their ideas as work progresses through researching, selecting, analysing, constructing and presenting artefact(s)/product(s)/personal outcome(s) • record their ideas, observations, insights and independent judgements, in ways that are appropriate to the Three-Dimensional Design title, such as cutting and constructing material in three-dimensions • use appropriate specialist vocabulary through either visual communication or written annotation, or both, within three-dimensional design • use visual language critically as appropriate to their own creative intentions and chosen area(s) of Three-Dimensional Design through effective and safe use of: ○ media ○ materials ○ techniques ○ processes ○ technologies • use drawing skills for different needs and purposes, appropriate to the area(s) of study used. Drawing may take the form of maquette, scale model(s) and computer-aided design using appropriate media and materials • realise personal intentions in Three-Dimensional Design, through the sustained application of the three-dimensional design process.
