

1. recall that coal is mainly carbon;
 2. recall that petrol, diesel fuel and fuel oil are mainly compounds of hydrogen and carbon (hydrocarbons);
 3. recall that, when fuels burn, atoms of carbon and/or hydrogen from the fuel combine with atoms of oxygen from the air to produce carbon dioxide and/or water (hydrogen oxide);
 4. recall that atoms are rearranged during a chemical reaction;
 5. interpret representations of the rearrangement of atoms during a chemical reaction;
 6. understand that during the course of a chemical reaction the numbers of atoms of each element must be the same in the products as in the reactants;
 7. understand that the conservation of atoms during combustion reactions has implications for air quality;
 8. recall that the properties of the reactants and products are different;
 9. understand how sulfur dioxide is produced if the fuel contains any sulfur;
 10. understand how burning fossil fuels in power stations and for transport pollutes the atmosphere with:
 - carbon dioxide and sulfur dioxide,
 - carbon monoxide and particulate carbon (from incomplete burning),
 - nitrogen oxides (from the reaction between atmospheric nitrogen and oxygen at the high temperatures inside engines);
 11. relate the formulas for carbon dioxide CO_2 , carbon monoxide CO , sulfur dioxide SO_2 , nitrogen monoxide NO , nitrogen dioxide, NO_2 and water H_2O , to visual representations of their molecules;
 12. **recall that nitrogen monoxide NO , is formed during the combustion of fuels in air, and is subsequently oxidised to nitrogen dioxide NO_2 (NO and NO_2 are jointly referred to as 'NOx');**
 13. understand that atmospheric pollutants cannot just disappear, they have to go somewhere:
 - particulate carbon is deposited on surfaces, making them dirty;
 - sulfur dioxide and nitrogen dioxide react with water and oxygen to produce acid rain;
 - carbon dioxide is used by plants in photosynthesis;
 - carbon dioxide dissolves in rain water and in sea water.
- ① Candidates are not required to write word or symbol equations.
