

6.4 How do electronic systems provide functionality to products and processes?

- | | | |
|----|---|--|
| a. | How sensors and control devices respond to a variety of inputs, including: <ul style="list-style-type: none">i. sensors including light dependent resistors (LDR), infra-red sensorsii. switches including tilt switches, push-to-make switches and time-delay switches. | 
 |
| b. | How devices are used to produce a range of outputs, including: <ul style="list-style-type: none">i. light-emitting diodes (LED) to produce lightii. speakers and buzzers to produce soundiii. motors to produce motion. |
