

7.5 How do processes vary when manufacturing products to different scales of product

- | | |
|---|--|
| <p>a. The methods used for manufacturing at different scales of production, including:</p> <ul style="list-style-type: none">i. one-off, bespoke productionii. batch productioniii. mass productioniv. lean manufacturing and just-in-time (JIT) methods. | |
| <p>b. Awareness of manufacturing processes used for larger scales of production, such as:</p> <ul style="list-style-type: none">• paper and boards, e.g. offset lithography, screen process printing, digital printing, vinyl cutting, die cutting• timber, e.g. CNC routers, sawing and steam bending machines and lathes• metals, e.g. CNC milling, turning, sheet metal folding, pressing and stampings, and die casting• polymers, e.g. compression moulding, injection moulding, vacuum forming, rotational moulding, extrusion and blow moulding• fibres and fabrics, e.g. band saw cutting, flatbed and rotary screen printing, digital lay planning, industrial sewing machines and overlockers, automated presses and steam dollies• design engineering, e.g. laser cutting, rapid prototyping and 3D printing. | |
