

2c. Content of Geographical Skills (J383/03)

Geographical skills are fundamental to the study and practice of geography. They are integrated into all aspects of the subject. The skills listed on the following pages provide a basis for further study and research across a range of subjects as well as being core skills for the world of work. Learning these skills in the context of the specification covering the six themes from components (01) and (02) will stimulate learners to 'think geographically'. It will also provide

them with opportunities to apply the skills in a wide range of curriculum or learning contexts.

Learners will be able to apply the skills listed below and overleaf in familiar and novel contexts. Teaching and learning should embed and contextualise the listed geographical skills into the content of Living in the UK Today (01) and The World Around Us (02).

3. Geographical Skills

3.1 With respect to cartographic skills, learners should be able to: 1. select, adapt and construct maps, using appropriate scales and annotations, to present information 2. interpret cross-sections and transects 3. use and understand coordinates, scale and distance 4. extract, interpret, analyse and evaluate information 5. use and understand gradient, contour and spot height (on OS and other isoline maps) 6. describe, interpret and analyse geo-spatial data presented in a GIS framework.	3.2 With respect to graphical skills, learners should be able to: 1. select, adapt and construct appropriate graphs and charts, using appropriate scales and annotations to present information 2. effectively present and communicate data through graphs and charts 3. extract, interpret, analyse and evaluate information.
Maps to be studied:	Graphs and charts to be studied:
Atlas maps	Bar graphs (horizontal, vertical and divided)
OS maps (1:50 000 and 1:25 000 scales)	Histograms (with equal class interval)
Base maps	Line graphs
Choropleth maps	Scatter graphs (including best fit line)
Isoline maps	Dispersion graphs
Flow line maps	Pie charts
Desire-line maps	Climate graphs
Sphere of influence maps	Proportional symbols
Thematic maps	Pictograms
Route maps	Cross-sections
Sketch maps	Population pyramids
	Radial graphs
	Rose charts
