

1.2.a. Components of fitness

Learners will develop their knowledge and understanding of the components of fitness, including cardiovascular endurance, muscular endurance, speed, strength, flexibility and agility. Learners will be able to define each component and be able to apply using a range of practical examples from physical

activities and sports. Learners will also develop their knowledge of suitable tests for each component.

Learners will be able to collect and use data related to the identified components of fitness.

Topic area	Learners must
Components of fitness  	Know the following components of fitness: • cardiovascular endurance/stamina ○ know the definition of cardiovascular endurance/stamina ○ be able to apply practical examples where this component is particularly important in physical activity and sport ○ know suitable tests for this component, including: – Cooper 12 minute run/walk test – multi-stage fitness test • muscular endurance ○ know the definition of muscular endurance ○ be able to apply practical examples where this component is particularly important in physical activity and sport ○ know suitable tests for this component, including: – press-up test – sit-up test • speed ○ know the definition of speed ○ be able to apply practical examples where this component is particularly important in physical activity and sport ○ know suitable tests for this component, including: – 30m sprint test • strength ○ know the definition of strength ○ be able to apply practical examples of where this component is particularly important in physical activity and sport ○ know suitable tests for this component, including: – grip strength dynamometer test – 1 Repetition Maximum (RM)

Topic area	Learners must
Components of fitness cont.  	• power ○ know the definition of power ○ be able to apply practical examples of where this component is particularly important in physical activity and sport ○ know suitable tests for this component, including: – ‘standing jump’ or ‘vertical jump’ tests • flexibility ○ know the definition of flexibility ○ be able to apply practical examples of where this component is particularly important in physical activity and sport ○ know suitable tests for this component, including: – ‘sit and reach’ test • agility ○ know the definition of agility ○ be able to apply practical examples of where this component is particularly important in physical activity and sport ○ know suitable tests for this component, including: – Illinois agility test • balance ○ know the definition of balance ○ be able to apply practical examples of where this component is particularly important in physical activity and sport ○ know suitable tests for this component, including: – ‘stork stand’ test • co-ordination ○ know the definition of co-ordination ○ be able to apply practical examples of where this component is particularly important in physical activity and sport ○ know suitable tests for this component, including: – ‘wall throw’ test • reaction time ○ know the definition of reaction time ○ be able to apply practical examples of where this component is particularly important in physical activity and sport ○ know suitable tests for this component, including: – reaction time ruler test • be able to collect and use data relating to the components of fitness.
