

Overview

- Learners should be able to explore, research and acquire techniques and develop their skills, knowledge and understanding in a range of approaches specific to Three-Dimensional Design.
- Learners should explore relevant images, text, design processes and resources relating to Three-Dimensional Design.
- Learners should demonstrate how they can problem solve by designing or creating products which have a decorative or functional role. They may include in their work one-off experimental pieces, traditional crafts, small batch production or industrial design for mass consumption. Learners should also demonstrate their understanding of processes.
- Learners in Three-Dimensional Design are expected to demonstrate specialisation in particular media or processes to an appropriate depth of study. This can be achieved by working toward the extension and development of particular themes, ideas or issues.
- Drawing skills should be understood and developed as appropriate to the ways of recording and communicating intentions, ideas and emotions in the context of Three-Dimensional Design.
