

4.2.1 Fertility and contraception

Learning outcomes	Additional guidance
<i>Learners should be able to demonstrate and apply their knowledge and understanding of:</i>	
(a) the parts of the male and female urinogenital systems	To include the interpretation of diagrams, photomicrographs and electron micrographs. <i>M0.1, M0.2, M1.1, M1.2, M1.8</i>
(b) (i) the histology of the ovaries and testes	To include the interpretation of diagrams, photomicrographs and electron micrographs. <i>M0.1, M0.2, M1.1, M1.2, M1.8</i>
(ii) observations of the histology of the ovaries and testes made using the light microscope	PAG1 HSW4, HSW5, HSW6
(c) the process of gametogenesis	To include oogenesis and spermatogenesis and relate these to mitosis and meiosis.
(d) the structure of the secondary oocyte and sperm related to their functions	To include the interpretation of diagrams, photomicrographs and electron micrographs. <i>M0.1, M0.2, M1.1, M1.2, M1.8</i>
(e) the role of hormones in gametogenesis	To include spermatogenesis: FSH, GnRH, LH, testosterone and inhibin AND oogenesis: FSH, LH, progesterone, oestrogen and GnRH.
(f) the role of hormones in the regulation of the menstrual cycle	To include LH, FSH, progesterone and oestrogen.

- | | |
|---|---|
| (g) the process of fertilisation | To include the importance in restoring chromosome number and introducing genetic variation. |
| (h) the use of monoclonal antibodies in pregnancy testing | No details of the production of monoclonal antibodies are required. |
| (i) an evaluation of the biological and ethical issues associated with methods of contraception. | To include the birth control pill, condom, femidom, diaphragm, hormone injections, hormone implants, tubal ligation, vasectomy
AND
anti-implantation methods to include IUDs, IUSs and the 'morning after pill'.
HSW9, HSW10, HSW12 |
