

5.2.2 Monitoring visual function

Learning outcomes	Additional guidance
<i>Learners should be able to demonstrate and apply their knowledge and understanding of:</i>	
(a) the structure of the eye	To include the location and function of the sclera, conjunctiva, cornea, iris, pupil, lens, ciliary body, aqueous humour, vitreous humour, choroid, and retina.
(b) (i) the structure of the retina	To include the structure and function of the following: rod cells, cone cells, bipolar cells and ganglion cells, the fovea and the blind spot.
(ii) practical observations of sections through the eye	PAG1 <i>M0.1, M0.2, M1.1, M1.2, M1.8</i>
(c) the function of the retina as a receptor of light stimuli and as a transducer	
(d) the assessment of receptor activity through routine eye tests.	To include tests for visual acuity, colour vision and OCT scans (optical coherence tomography). HSW9, HSW10, HSW11, HSW12
