

3.2. Design of the solution (15 marks)	
3.2.1 Decompose the problem	a) Break down the problem into smaller parts suitable for computational solutions justifying any decisions made.
3.2.2 Describe the solution	a) Explain and justify the structure of the solution. b) Describe the parts of the solution using algorithms justifying how these algorithms form a complete solution to the problem. c) Describe usability features to be included in the solution. d) Identify key variables / data structures / classes justifying choices and any necessary validation.
3.2.3 Describe the approach to testing	a) Identify the test data to be used during the iterative development and post development phases and justify the choice of this test data.
