

3.1 What factors need to be considered whilst investigating design possibilities?

- a. Understand how social, ethical and environmental issues have influenced and been impacted by past and present developments in design practice and thinking, including:
- consideration of lifecycle assessment (LCA) at all stages of a product's life from raw material to disposal
 - the source and origin of fibres and the ecological and social footprint of materials
 - the depletion and effects of using natural sources of energy and raw materials
 - planned obsolescence
 - consumer buying trends
 - environmental incentives and directives.
