

5.3 Why is it important to consider the properties/characteristics of materials when designing and manufacturing products?

- | | | |
|----|---|---|
| a. | Understand why the natural characteristics and properties of the fibres, yarns and fabrics in 5.2 to make them suitable for use in a variety of products dependent on the contextual application, including: <ul style="list-style-type: none">tensile strength, softness, texture, durability, resilience, weight, stiffness, elasticity, flammability, absorbency, washability, breathability, thermal and electrical conductivity, resistance to decay, biodegradable. |  |
| b. | Understand how the available forms, costs and properties of materials contribute to the decisions about suitability of materials when developing and manufacturing their own products. |  |

6. Technical understanding
