

7.1 How can materials and processes be used to make iterative models?

- | | | |
|----|---|--|
| a. | Understand that iterative models can be made from a range of materials to create samples, toiles and other modelled concepts to communicate and test ideas, fit and structural integrity. | |
| b. | Demonstrate an understanding of how to develop iterative models using pattern making, pattern drafting and toiles to be able to test garments and form of other textiles products. | |
| c. | Understand the use of both hand tools and digital tools such as rapid prototyping, or digital simulation packages to support the creation of iterative developments. | |
