

1.3 How can usability be considered when designing prototypes?		
TECHNICAL PRINCIPLES	a. Learners should be able to analyse and evaluate factors that may need consideration in relation to the user interaction of a design solution, including: i. the impact of a solution on a user's lifestyle ii. the ease of use and inclusivity of products iii. ergonomic considerations and anthropometric data to support ease of use iv. aesthetic considerations.	
	b. Demonstrate an understanding of the ergonomic factors that may need considering when developing products, including: i. anthropometric data to help define design parameters associated with the human body ii. user comfort, layout of controls, software user interface.	

2. Learning from existing products and practice
