

6.2 How can products be designed to function effectively within their surroundings?

- | | | |
|----|---|---|
| a. | Understand how surface finishes and coatings can be used to enhance the appearance of products and the methods of preparing different surfaces to accept finishes in order to deliver a decorative, colourful and quality outcome. |  |
| b. | Understand how materials and products can be finished in different ways to prevent corrosion or decay in the environment they are intended for, such as: <ul style="list-style-type: none">• paints, varnishes, sealants, preservatives, anodising, plating, coating, galvanisation and electroplating. |  |
