

4.7.6 Mathematical Formulae and Statistical Tables

A booklet (MF2, January 2007 version) containing Mathematical Formulae and Statistical Tables is available for the use of candidates in all unit examinations.

Details of formulae which candidates are expected to know and the mathematical notation that will be used in question papers are contained in Appendices A and B.

A fuller booklet, entitled *Students' Handbook*, is also available for students' use during the course. This includes all relevant formulae for each unit; those that students are expected to know are identified. The *Students' Handbook* also includes a list of the notation to be used and the statistical tables. Schools and colleges needing copies for their students' use may obtain them from the MEI Office (see Section 7 for the address).
