

2.2 Sports psychology

In this topic, learners will develop their knowledge and understanding of the psychological factors that can affect performers in physical activity and sport.

Learners knowledge and understanding will be developed on the individual differences affecting

performers in physical activity and sport; group and team dynamics in sport; the importance of goal setting in sports performance; the role of attribution in motivating performers; confidence and self-efficacy in sport; leadership in sport and stress management in physical activities and sports to optimise performance.

Topic Area	Content
Individual differences  	• personality ◦ definition of personality ◦ theories of personality: – trait – extroversion/introversion, stable/unstable, type a/type b – social learning – interactionist • attitudes ◦ definition of attitude ◦ factors affecting attitude formation ◦ components of attitude: – cognitive – affective – behavioural

Topic Area	Content
Individual differences cont.  	○ methods of attitude change: – persuasive communication – cognitive dissonance • motivation ○ definitions of: – intrinsic motivation – extrinsic motivation ○ uses and effects of: – intrinsic motivation – extrinsic motivation • arousal ○ definition of arousal ○ effects of arousal: – drive theory – inverted U theory – catastrophe theory • anxiety ○ definition of anxiety ○ types of anxiety: – state and trait ○ response to anxiety: – somatic and cognitive – zone of optimal functioning. • aggression ○ definition of aggression ○ theories of aggression: – instinct – social learning – frustration-aggression hypothesis – aggressive cue hypothesis • social facilitation ○ definition of social facilitation and social inhibition ○ the effect of an audience on: – introverts/extroverts – beginners/experts – simple/complex skills – gross/fine skills ○ evaluative apprehension ○ strategies to minimise social inhibition.
Group and team dynamics in sport 	• definition of a group • the formation of groups and sports teams using stages of group development ○ forming ○ storming ○ norming ○ performing

Topic Area	Content
Group and team dynamics in sport cont. 	- Steiner's model of group effectiveness - Ringelmann effect and social loafing.
Goal setting in sports performance  	- importance and effectiveness of goal setting - for attentional focus - persistence on tasks - raising confidence and self-efficacy - control of arousal and anxiety - to monitor performance - the SMART principle (Specific, Measurable, Achievable, Recorded, Time phased).
*Attribution  	- Weiner's model of attribution - stability dimension (unstable and stable) - locus of causality dimension (internal and external) - controllability dimension - learned helplessness as a barrier to sports performance - mastery orientation to optimise sports performance
*Confidence and self-efficacy in sports performance.  	- definitions of sports confidence and self-efficacy - the impact of sports confidence on: - performance - participation - self-esteem - Vealey's model of sports confidence: - trait sports confidence - competitive orientation - state sports confidence - subjective perceptions of outcome - Bandura's theory of self efficacy: - performance accomplishments - vicarious experiences - verbal persuasion - emotional arousal.
*Leadership in sport  	- characteristics of effective leaders - emergent or prescribed leaders - leadership styles - autocratic - democratic - laissez-faire - theories of leadership - trait perspective - social learning - interactionist - Chelladurai's multi-dimensional model of sports leadership.

Topic Area	Content
*Stress management to optimise performance  	• definition and causes of stress • use of cognitive stress management techniques: ○ positive thinking/self-talk ○ negative thought stopping ○ rational thinking ○ mental rehearsal ○ imagery ○ goal setting ○ mindfulness • use of somatic stress management techniques: ○ progressive muscular relaxation ○ biofeedback ○ centring technique ○ breathing control.
