

5.4.1 Point and spherical masses

Learning outcomes	Additional guidance
<i>Learners should be able to demonstrate and apply their knowledge and understanding of:</i>	
(a) gravitational fields are due to objects having mass	
(b) modelling the mass of a spherical object as a point mass at its centre	
(c) gravitational field lines to map gravitational fields	HSW1
(d) gravitational field strength; $g = \frac{F}{m}$.	
(e) the concept of gravitational fields as being one of a number of forms of field giving rise to a force.	Learners will be expected to link this with section 6.2
